

AVINASH SUNIL SHINDE

Senior Android / Java Engineer

Pune, Maharashtra | 9503495509 / 8669026620 | shindeavi21@gmail.com

Senior software engineer with 10+ years of experience in Android and Java application development, mobile application delivery, Spring Boot, RESTful services and microservices. Experienced across automotive, banking, security, fitness and e-commerce domains, with production Android applications and Google Play Store delivery.

EDUCATION

Master of Computer Applications

University of Pune | 2015 | 65%

Bachelor of Computer Applications

University of Nanded | 2012 | 66.36%

CORE COMPETENCIES

Android Application Development

- Java & Kotlin Development
- Mobile Application Delivery
- Android Library Development
- Spring Boot & Microservices
- RESTful Web Services
- Production Support & Troubleshooting
- API Support & Monitoring
- Application Maintenance
- Client & Team Collaboration
- CRUD / Data Filtering / Search
- Google Play Store Delivery

TECHNICAL SKILLS

Languages:

Java, Kotlin, Dart, C++, JavaScript, XML

Mobile:

Android, Android SDK, Android Auto, Flutter

Architecture:

MVC, MVP, MVVM, Microservices

Backend:

Spring Boot, RESTful Web Services, Core Java

Web:

React, HTML, JavaScript

Database:

PostgreSQL, SQLite

Tools:

GitHub, Android Studio, Eclipse, VS Code, STS

OS:

Windows, Linux / Ubuntu

CAREER TIMELINE

Max Mobi Secure Software | 06/2016 – 04/2018

Scriptlanes Pvt. Ltd. | 05/2018 – 09/2018

Infosys Technology | 12/2018 – 04/2019

Tata Technologies | 06/2019 – 09/2022

Fujitsu | 09/2022 – Present

PROFILE SUMMARY

- Senior Android / Java engineer with 10+ years of experience in application development, maintenance, troubleshooting and delivery.
- Strong experience developing Android applications using Java and Kotlin, with experience in MVC, MVP and MVVM architectures.
- Hands-on experience with Spring Boot, RESTful Web Services, microservices, PostgreSQL and SQLite.
- Experience developing, exporting and maintaining Android libraries and publishing production APKs to Google Play Store; 10+ applications are stated as live on Google Play Store.
- Worked across automotive, banking, security, fitness and e-commerce applications, with strong collaboration and problem-solving skills.

WORK EXPERIENCE

Application Developer | Fujitsu | Sep'22 – Present

Application development and maintenance across Android and Java technology stacks.

- Develop and maintain Android and Java applications and contribute to feature implementation and application maintenance.
- Troubleshoot application issues, investigate defects and support technical problem resolution.
- Contribute to production support, debugging and application delivery activities.

Application Developer | Tata Technologies | Jun'19 – Sep'22

Application development across automotive, Android and Flutter solutions.

- Worked on automotive applications involving vehicle information, customer services and Android Auto.
- Developed and maintained Flutter applications supporting Android and iOS platforms.
- Implemented application features, integrated platform APIs and supported application maintenance and troubleshooting.

Application Developer | Infosys Technology | Dec'18 – Apr'19

Payroll: JoulesToWatts, Bangalore (On Contract). Banking-domain application support.

- Worked on a banking-domain project using Core Java and C++.
- Supported APIs related to analytics and monitoring, including error-handling and maintenance activities.

Application Developer | Scriptlanes Pvt. Ltd. | May'18 – Sep'18

- Contributed to software application development and maintenance using Java/Android technologies.

Application Developer | Max Mobi Secure Software | Jun'16 – Apr'18

Android application development for mobile security products.

- Developed Android applications using Java and Android technologies.
- Worked on antivirus scanning, temporary-file cleanup, Wi-Fi analysis, cloud contact backup and anti-theft functionality.
- Contributed to application releases, production maintenance and troubleshooting.

CAREER SNAPSHOT

- 10+ years experience
- Android + Java development
- Kotlin and Flutter experience
- Spring Boot + Microservices
- RESTful Web Services
- PostgreSQL + SQLite

DOMAINS

- Automotive
- Banking
- Security
- Fitness
- E-commerce
- Customer Service

APPLICATION DELIVERY

- APK generation
- Google Play Store publishing
- Android library development
- API support & monitoring
- Production troubleshooting

PROJECTS

Project: GENPIN — React / Spring Boot / PostgreSQL

Project Overview: Application for maintaining Nissan parts and service history.

- Implemented CRUD features, data filtering and search.

Project: Android Auto / M-Connect

Project Overview: Automotive application collecting vehicle data such as speed, fuel and odometer and synchronizing data with mobile and online databases.

- Implemented Android Auto car UI to display corresponding vehicle features.

Project: Nissan Service

Project Overview: Customer-facing vehicle servicing application used in Thailand.

- Worked with vehicle data, customer information, billing information, questionnaires and service check-sheets.

Project: Cloud POS — Flutter

Project Overview: Hybrid e-commerce desktop and Android tablet application for H&M.

- Worked on e-commerce application functionality using Flutter.

Project: Komatsu BKS — Flutter

Project Overview: Hybrid e-commerce application supporting Android and iOS.

- Handled platform-specific OS APIs and application functionality.

Project: Instant Quantified Self

Project Overview: Fitness and location tracking application.

- Worked with location history, time spent tracking, app usage and Google Fit-related functionality.

Project: Max Total Security

Project Overview: Android mobile security application.

- Worked on virus detection/cleanup, temporary-file cleanup, Wi-Fi analysis, cloud contact backup and anti-theft functionality.

ENGINEERING HIGHLIGHTS

- Android application development using Java and Kotlin across multiple domains.
- Experience creating and exporting Android libraries through GitHub.
- Experience generating APKs and publishing Android applications to Google Play Store.
- Production support experience including API support, monitoring, error handling and troubleshooting.
- Experience working with PostgreSQL, SQLite, Spring Boot, RESTful services and microservices architecture.

EDUCATION

- Master of Computer Applications (MCA) — University of Pune, 2015 — 65%
- Bachelor of Computer Applications (BCA) — University of Nanded, 2012 — 66.36%
- HSC — Maharashtra Board, 2009 — 82.67% | SSC — Maharashtra Board, 2007 — 66.67%

TARGET PROFILE

Senior Android / Java Engineer
